# A WORLD OF GAMING

At Target Games we produce superb miniature models for playing tabletop wargames. You collect and paint these miniature warriors to build fantastic armies, which you can then use to play a game of Warzone or Chronopia. These games use a set of rules that tell you everything you need to know about how the models in your army will move and fight on the battlefield. Players use strategy and tactics to command their army then roll dice to decide if their skill is enough to earn them victory.

## 1. COLLECTING

Many people collect Target Games miniatures just to paint and put on display. Others collect them to use in their Warzone and Chronopia battles, building their armies one model at a time. The miniatures come in plastic blister packs containing one or two models or box sets containing one big model or even an entire squad of miniatures. You can buy these models at your local hobby games store or you can use our mail order service (see the mail order section at the back of this catalogue). Also check out the latest new releases and special deals in our gaming magazine 'New Era Chronicles', or contact our on-line store at [www.target.se](http://www.target.se).

## 2. PAINTING

Miniatures look even better when they are painted, making your battles, displays and dioramas all the more impressive. All our blister packs and box sets have pictures of fully painted models, which you can either copy directly or use as a guide for creating your own color schemes. Target Games produces high quality paint brushes and acrylic paints specially designed for painting your miniatures, with detailed color transfers to add a professional touch to shields and banners etc. We also feature regular painting guides in New Era Chronicles to give you lots of help and expert tips.

## 3. BUILDING YOUR ARMY

The models you buy are used to build powerful armies. These armies are made up of squads and warbands, small groups of warriors that fight together as a unit. Many of the box sets contain complete squads making it easy to build your army quickly. You can then add to these basic squads with specialist models that are sold separately in blister packs. Your armies don't need to be huge; you can play a great game with as few as ten miniatures in your army, then as your armies grow you can fight larger and more impressive campaigns.

## 4. TABLETOP BATTLEFIELDS

Warzone and Chronopia are tabletop battle games; there is no special board. You can play these superb games on any flat surface but a large desk or table is preferable. A purpose built gaming table is great if you have the space and the joinery skills, but it is by no means essential. It is easy to transform an ordinary kitchen or dining room table into a glorious battlefield where you command mighty armies and blood-thirsty heroes. All you need to do is cover the table with a green cloth and away you go.

## 5. SETTING THE SCENE

Enhancing your battlefield is made easy with the card buildings in our 3D Expansion Sets and our superb range of resin scenery. Building your own terrain is also great fun. Don't worry if you've never tried it before, we feature loads of terrain building articles in Chronicles, our regular gaming magazine, to give you plenty of inspiration.

## 6. LET BATTLE COMMENCE

Once you've collected and painted your army you are ready to meet your opponent on the field of battle. You have read the rules and rehearsed the ultimate strategy. All that remains is to roll the dice and let the battle commence. When the carnage is over pick up your copy of Archives and decide how best to improve your army in preparation for the next encounter, because in the worlds of Warzone and Chronopia the struggle for victory never ends.

# WARZONE

## THE NEW ERA

At Target Games we want to share our passion for gaming with players all over the world.

To make sure you get the most from your hobby we publish a monthly gaming magazine called New Era Chronicles. This is a regular source of inspiration to give players the complete gaming experience.

Chronicles is filled with articles covering every aspect of the hobby. There are painting guides that take you through the various stages of painting a miniature with tons of tips and techniques to ensure that you get great results.

There are terrain-building articles for beginners and experts alike. Exciting battle reports, with photographs and diagrams, take you through every explosive attack and valiant retreat of Warzone and Chronopia games. We have the bulletin board with all the latest news, new releases and sneak previews of life here in the studio.

There are scenarios for you to base your own games on and loads of artwork, battleshots and color photographs to wet your appetite. We also have the catalogue section, which showcases new releases and featured armies.
